Kletec is currently active in 16 countries around the world. Customers appreciate our no-nonsense approach and prompt service. Our machines are almost always functional and we can repair any malfunctions quickly; also outside the Netherlands. We work with reliable local parties.

We understand that your business needs to be up and running continuously. Kletec's machines and service are designed to assist your company in this and ensure that the machines are continuously operational. Thus, your return will remain at the desired level and the machine is not a limiting factor in your production.

The ANT20 is a very safe machine. An alarm will trigger if something suspicious is happening.
